

STARCO AS & MP DUMPER

Meet all demands

Designed for maneuverability, stability and reliability

STARCO Dumper tyres are designed and engineered to be **hardwearing and rugged** enough to handle **heavy loads in arduous terrain**.

Our tyres are sufficiently flexible to endure the stresses of tight manoeuvring under heavy loads, without impairing the steering and handling characteristics of the machine. The overall design and construction of the carcass ensure excellent lateral stability. A fully loaded dumper fitted with STARCO Dumper tyres easily maintains lateral stability above the regulatory minimum tilt-test required in most European countries and outperforms all comparable competitors.

STARCO AS Dumper

- ▶ Excellent traction and self cleaning
- ▶ For dumpers, loaders, digger-loaders etc.
- ▶ Long lifetime
- ▶ Cost effective

The STARCO Dumper tyre is of **bias belted design** - the preferred choice of the construction industry due to its **superior ability** to withstand sidewall impact and **excellent lateral stability** compared to radial tyres.

The heavy lug tread has a high net-to-gross area on the centre line, which results in better performance on hard standing surfaces, reduced wear, reduced tread noise and improved handling characteristics. The complex side angles and the fore and aft faces of the lugs promote self-cleaning in muddy conditions and give good traction and stability.

STARCO MP Dumper

- ▶ Multi purpose use
- ▶ Improved tread wear on hard ground and roadways
- ▶ For dumpers, loaders, digger-loaders etc.
- ▶ Long lifetime
- ▶ Cost effective

Though primarily employed on dumper trucks, the STARCO Dumper tyre is also an eminent solution for "fetch and carry" machinery such as telescopic handlers, loaders, side loaders, compact tractors, and some excavators.

The e-coat is an electrodeposition coating process, in which steel wheels are given a priming coat that will prevent rust and corrosion throughout the normal working life of the wheel.

The coating process is environmentally friendly and serves as a rust prevention coating in itself - and also as an excellent primer to prepare the wheel for subsequent bespoke painting.

By this STARCO is using the latest automotive nanotechnology pre-treatment.

STARCO is the only manufacturer of pressed wheels with e-coat technology.

About e-coating

STARCO – a Kenda company

STARCO has been a pioneering force in the wheel and tyre industry for more than 55 years. Today, 550 STARCONians make up a great team bound by a passion to develop, manufacture and deliver clever wheel solutions. STARCO's specialty is low and high volume standard and bespoke complete wheels for a wide range of applications – from the smallest wheelbarrow or trailer, to large agricultural or industrial machines and implements.

With factories in the UK, Croatia, and China as well as eight sales and distribution locations across Europe, STARCO has a widespread distribution network. STARCO had a turnover of 110 million EUR in 2016. STARCO is a part of the Kenda Group that is one of the world's leading tyre and tube manufacturers with factories all over the world and 11,000 employees globally.
