

STARCO HT Pro

A high-quality complete wheel concept for hay tedders allowing for better performance, easier maintenance and improved reliability in the field.

- ▶ **Better performance** due to increased puncture resistance and a unique innovative pattern for optimum rolling and limited resistance to lateral pressure.
- ▶ **Stability** due to the low profile tyre even at high speed in the field, remaining the widest possible ground contact resulting in the lowest impact per cm² thus reducing the risk of puncture.
- ▶ **Improved reliability** due to a tubeless, stronger tyre-construction, STARCO's rust preventing e-coat technology, and a perfect match between tyre and wheel air loss prevention.
- ▶ **Easy maintenance** due to an innovative wheel design preventing grass from wrapping around the hub and axle, hence less rust on the axle and less need for inconvenient stops and expensive after service.
- ▶ **STARCO engineered, developed and manufactured** wheel, resulting in the optimal upgrade of existing hay tedders or matching the requirements for new from the market.

A high-quality **complete wheel** concept for hay tedders allowing for **better performance, easier maintenance** and **improved reliability** in the field.

The e-coat is an electrodeposition coating process, in which steel wheels are given a priming coat that will prevent rust and corrosion throughout the normal working life of the wheel.

The coating process is environmentally friendly and serves as a rust prevention coating in itself - and also as an excellent primer to prepare the wheel for subsequent bespoke painting.

By this STARCO is using the latest automotive nanotechnology pre-treatment.

STARCO is the only manufacturer of pressed wheels with e-coat technology.

About e-coating

Tyre

Tubeless, 160/50-10 (16x6.00-10)

Wheel

5.00x10, e-coated with safety humps

Speed

Low speed application 72B - 355kg @ 50km/h

Applications

Hay tedders, hay rakes and windrowers

Type of use

100% on soft ground – stubble field and grass areas

Compliance

PAH, REACH

About STARCO – a Kenda company

STARCO has been a pioneering force in the wheel and tyre industry for more than 55 years. Today, 550 STARCONians make up a great team bound by a passion to develop, manufacture and deliver clever wheel solutions. STARCO's specialty is low and high volume standard and bespoke complete wheels for a wide range of applications – from the smallest wheelbarrow or trailer, to large agricultural or industrial machines and implements.

With factories in the UK, Croatia, Sri Lanka and China, as well as eight sales and distribution locations across Europe, STARCO has a widespread distribution network. STARCO had a turnover of 110 million EUR in 2016. STARCO is a part of the Kenda Group that is one of the world's leading tyre and tube manufacturers with factories all over the world and 11,000 employees globally.
