Premium pneumatic tyres for **horticulture** and **landscaping**

Kenda Super
Turf K500

Kenda K502
Terra Trac

Kenda K505 Turf

Kenda K506

Kenda K507

Kenda K513
Commercial Turf

The Kenda K5XX series is primarily used in the municipal sector, but also in horticulture and landscaping at home.

They are characterized by a high tread depth and an excellent traction. On turf, they provide a large contact area and a rounded shoulder for optimal soil protection. On the road they excel with sipes in the blocks and a harder rubber compound.

Available in 88 different models, ranging from 4" to 16.5".

With Kenda, STARCO has the widest premium lawn tyre programme available anywhere.

The e-coat is an electrodeposition coating process, in which steel wheels are given a priming coat that will prevent rust and corrosion throughout the normal working life of the wheel.

The coating process is environmentally friendly and serves as a rust prevention coating in itself - and also as an excellent primer to prepare the wheel for subsequent bespoke painting.

By this STARCO is using the latest automotive nanotechnology pre-treatment.

STARCO is the only manufacturer of pressed wheels with e-coat technology.

About e-coating

STARCO – a Kenda company

STARCO has been a pioneering force in the wheel and tyre industry for more than 55 years. Today, 550 STARCONians make up a great team bound by a passion to develop, manufacture and deliver clever wheel solutions. STARCO's specialty is low and high volume standard and bespoke complete wheels for a wide range of applications – from the smallest wheelbarrow or trailer, to large agricultural or industrial machines and implements.

With factories in the UK, Croatia and China, as well as eight sales and distribution locations across Europe, STARCO has a widespread distribution network. STARCO is a part of the Kenda Group that is one of the world's leading tyre and tube manufacturers with factories all over the world and 10,000 employees globally.
