

## STARCO HS Flotation

A premium wheel and tyre solution perfect for agricultural implements that work hard in the field and roll fast on the road.

- ▶ **Maximum stability** in the field and on the road due to a unique radial construction.
- ▶ **Reduced ground pressure** due to the flat profiled tyre and the large footprint.
- ▶ **Optimum rolling** due to a special-optimised line pattern, shoulder traction and combined flotation pattern construction.
- ▶ **Better self-cleaning** due to the intelligent placement of the mud breakers in the tread bottom.
- ▶ **Perfect fit** allows for upgrade of existing implements due to standard dimensions.
- ▶ **Improved reliability** due to STARCO's rust preventing e-coat technology of the steel wheel and a perfect match between tyre and wheel for less air loss.
- ▶ **STARCO engineered, developed and manufactured** wheel.

### Upgrade existing implements

Most implement-tyres are traditionally not designed for high speed use. The special tread design and construction of STARCO HS Flotation radial tyres allow for upgrading existing implements.

	Kg	Km/h	Bar
<b>Transport, high load at high speed</b>	3,550	65	5.0
<b>Implement tools, high load at normal speed</b>	3,969	40	4.4
<b>Seeding, high load at high speed</b>	3,109	15	2.4

<b>Tyre</b>	400/55R17
<b>Wheel</b>	13.00x17, e-coated with safety humps
<b>Speed</b>	Low speed and high speed applications up to 65km/h
<b>Application</b>	Harrows, rollers, seed drills, trailers and the like
<b>Overall diameter (mm)</b>	882
<b>Rolling circumference (mm)</b>	2714
<b>Section width (mm)</b>	410
<b>Type of use</b>	50% / 50% on road and in field
<b>Compliance</b>	PAH, R106

## Load calculation based on speed and pressure

SPEED	1.0 bar	1.2 bar	1.4 bar	1.6 bar	1.8 bar	2.0 bar	2.2 bar	2.4 bar	2.6 bar	2.8 bar	3.0 bar	3.2 bar	3.4 bar	3.6 bar	3.8 bar	4.0 bar	4.2 bar	4.4 bar	4.6 bar	4.8 bar	5.0 bar

The e-coat is an electrodeposition coating process, in which steel wheels are given a priming coat that will prevent rust and corrosion throughout the normal working life of the wheel.

The coating process is environmentally friendly and serves as a rust prevention coating in itself - and also as an excellent primer to prepare the wheel for subsequent bespoke painting.

By this STARCO is using the latest automotive nanotechnology pre-treatment.

STARCO is the only manufacturer of pressed wheels with e-coat technology.

## About e-coating

### STARCO – a Kenda company

STARCO has been a pioneering force in the wheel and tyre industry for more than 55 years. Today, 550 STARCONians make up a great team bound by a passion to develop, manufacture and deliver clever wheel solutions. STARCO's speciality is low and high volume standard and bespoke complete wheels for a wide range of applications – from the smallest wheelbarrow or trailer, to large agricultural or industrial machines and implements.

With factories in the UK, Croatia and China, as well as eight sales and distribution locations across Europe, STARCO has a widespread distribution network. STARCO is a part of the Kenda Group that is one of the world's leading tyre and tube manufacturers with factories all over the world and 10,000 employees globally.
