

STARCO Flex

100% puncture-free wheels from STARCO

- ▶ Shock absorption comparable to pneumatics
- ▶ Load capacity comparable to pneumatics
- ▶ Lightweight solid tyres – considerably lighter than conventional solid tyre
- ▶ Efficiency – no downtime due to punctures
- ▶ Long-lasting – up to four times the endurance of pneumatics
- ▶ Maintenance-free
- ▶ Lower operational cost

YouTube

STARCO Flex Pro

STARCO Flex Pro is recommended on more smooth surface, but still workable on soft and semi-uneven sites. The Flex system will adapt to the ground giving a easy use in service - The Pro solution.

The assembly comes in various versions that fit any demand.

- ▶ STARCO Flex Pro fitted on STARCO PP wheel – for light application, with the puncture free features and no risk for rusty wheels under any conditions
- ▶ STARCO Flex Pro fitted on STARCO steel wheel – for more demanding application, with the puncture free features and no risk for rusty wheels, due the our Automotive standard E-coat system

- ▶ Handling and performance characteristics comparable to traditional pneumatics
- ▶ STARCO Flex Pro is proven in practice for many professional applications
- ▶ Efficiency: No service or repairs required, no costly downtime
- ▶ STARCO designed, engineered and produced

STARCO Flex Lite

STARCO Flex Lite is recommended on smooth surface and semi-rough terrain, mainly for private user or lighter professional service.

- ▶ The assembly comes in various versions that fit any demand
- ▶ STARCO Flex Lite is supplied as wheel and tyre in one unit in a PP/PU construction
- ▶ It comes as standard in Yellow/Black, but other colors are possible on order (larger scale)
- ▶ The Flex system in the construction makes an easy ride, making the wheel suitable for a wider range of application and area for lighter use
- ▶ Handling and performance characteristics comparable to traditional pneumatics
- ▶ STARCO Flex Lite is proven in practice for less demanding professional use
- ▶ Efficiency: No service or repairs required, no costly downtime
- ▶ STARCO designed, engineered and produced

STARCO Flex Lite - for sack trucks

The Sack truck version of our STARCO Flex Lite is most likely the ONLY wheel that are needed.

It makes the job as a wheel very good – Keeping the usability of the application on a very high level as well as it will never let the user down with a flat tyre.

Most application using small tyres like 3.00-4 are never used day in and day out – It will often be fitted on application that over a longer period of time will be off service – making it more important that it is inflated and ready to run at any point of time.

Strong innovative culture and agile plastic wheel and PU tyre manufacturing as well as in-house design and mould manufacturing. We excel in puncture-proof tyres and produce more than 750,000 4 to 18-inch wheels a year.

STARCO – a Kenda company

STARCO has been a pioneering force in the wheel and tyre industry for more than 55 years. Today, 550 STARCOonians make up a great team bound by a passion to develop, manufacture and deliver clever wheel solutions. STARCO's specialty is low and high volume standard and bespoke complete wheels for a wide range of applications – from the smallest wheelbarrow or trailer, to large agricultural or industrial machines and implements.

With factories in the UK, Croatia and China, as well as eight sales and distribution locations across Europe, STARCO has a widespread distribution network. STARCO is a part of the Kenda Group that is one of the world's leading tyre and tube manufacturers with factories all over the world and 10,000 employees globally.
