

## Galaxy Rasenreifen

When machines are used on special surfaces, such as fine sand or sensitive grass, special tyres are required which ensure maximum work results with minimal soil loading. Galaxy turf tyres have been developed in collaboration with leading golf course operators and are therefore optimized for lawn-friendly work.

## Galaxy Might Mow

- ▶ Developed with the best greenkeepers on leading golf courses
- ▶ Highest standard in flotation properties for minimum ground pressure

## Galaxy Turf Special

- ▶ Designed for very high flotation properties
- ▶ Highest protection of the sward and root system.

The **e-coat is an electrodeposition coating process**, in which steel wheels are given a priming coat that will prevent rust and corrosion throughout the normal working life of the wheel.

The coating process is environmentally friendly and serves as a rust prevention coating in itself - and also as an excellent primer to prepare the wheel for subsequent bespoke painting.

By this STARCO is using the latest automotive nanotechnology pre-treatment.

STARCO is the only manufacturer of pressed wheels with e-coat technology.

## STARCO – a Kenda company

STARCO has been a pioneering force in the wheel and tyre industry for more than 55 years. Today, 550 STARCONians make up a great team bound by a passion to develop, manufacture and deliver clever wheel solutions. STARCO's speciality is low and high volume standard and bespoke complete wheels for a wide range of applications – from the smallest wheelbarrow or trailer, to large agricultural or industrial machines and implements.

With factories in the UK, Croatia and China, as well as eight sales and distribution locations across Europe, STARCO has a widespread distribution network. STARCO is a part of the Kenda Group that is one of the world's leading tyre and tube manufacturers with factories all over the world and 11,000 employees globally.
